

Updated Medication Withdrawal Times (February 2012)

Dalare Labs, the official chemists of the Delaware Thoroughbred and Harness Racing Commissions, has released a list of equine medications and their withdrawal times. Please remember that these are recommended minimum withdrawal times/guide lines only, and do not relieve the trainer of his responsibility under the Trainer responsibility rules of the Commissions. If these guidelines are followed, when using these therapeutic medications, the chances of a positive test are minimized. Below is the list of 94 medications and their recommended withdrawal times.

<u>Drug</u>	<u>Withdrawal Time</u>	<u>Drug</u>	<u>Withdrawal Time</u>
